// SOFT SKILLS

- Agile team collaborator
- Clear communicator
- Fast learner
- Self-driven & proactive

// PROFESSIONAL SUMMARY

Motivated Software Engineering student completing a Bachelor of Computing (NQF Level 8) at Belgium Campus ITversity, currently in the workplace training year as an Intern Software Engineer at Tubecon Africa. Proven ability to deliver full-stack solutions - from database architecture to front-end implementation - across real commercial projects. Skilled at integrating third-party APIs, building internal tooling, and collaborating within cross-functional teams. Actively seeking a junior developer role in a dynamic, forward-thinking organisation.

// WORK EXPERIENCE

Intern Software Engineer @ *Tubecon Africa*

$ Jan 2025 - Dec 2026 · Currently Employed

- Integrated the META WhatsApp Cloud API to automate client communication workflows, significantly reducing manual effort for the customer relations team.
- Developed internal tooling that measurably streamlined the sales team's daily operations and reporting processes.
- Built and maintained production web applications in collaboration with cross-functional teams across design, sales and management.
- Worked across the full stack - from database schema design and query optimisation to responsive front-end implementation.
- Contributed to company-built Android software and built productivity systems to enhance operational efficiency.

// EDUCATION

Bachelor of Computing - NQF Level 8 — 2022 – 2027

Belgium Campus ITversity, Pretoria · Software Engineering · 506 Credits · 4th Year

Relevant modules: Software Architecture & Engineering, Database Development & Administration, Web Programming, Machine Learning Fundamentals, Software Analysis & Design, Project Management, Information Systems, Networking, Statistics & Linear Programming, Research Methods.

National Senior Certificate (Matric) — 2021

Afrikaans Hoër Seunskool, Pretoria · Pure Math · IT · CAT · EGD · Afrikaans · English · LO

// PROJECTS & ACCOMPLISHMENTS

BandwidthBandits CampusLearn → github.com/Vastorra/BandwidthBanditsCampusLearn

An education assistance platform for university students - enabling material uploads, group study sessions, peer tutoring, and clarification requests. Includes an AI chatbot that answers subject questions, schedules sessions, and sends mass messages to user groups.

Linear Programming Calculator

Collaborated with a team to build an application solving LP problems: Branch & Bound, Cutting Plane, Dual Theorem and Primal Simplex methods.

Gas-Detecting Drone

Remote-controlled drone that detects gas compounds and relays telemetry data to a monitoring application, built using Arduino, sensors and custom telemetry software.

- Performs under pressure
- Analytical problem-solver
- Quick to adapt

Personal Portfolio Website → vastorra.github.io/CV

Designed and developed a professional portfolio site with animated typing effects, scroll-reveal animations, Formspree contact integration, Devicon skill icons and fully responsive mobile layout.

Asynchronous RESTful API

Designed and developed an async RESTful API for a mobile application - endpoint architecture, data modelling and integration testing.
